For as long as I can remember, I have always wanted to be a teacher. Teaching has been a part of who I am since I was a very young child. I have always loved school and learning, and I have wanted other children to have the same desire and love of learning. I believe all children can learn and that our job as a teacher is to help motivate our students to learn. Learners are diverse in so many ways. I believe as educators, we must do our best using differentiated strategies to best meet the needs of all learners. The Chinese proverb states, "Give a man a fish and you feed him for a day. Teach a man to fish and you feed him for a lifetime." I believe this is our job as educators. We need to teach our children to not only learn, but to become lifelong learners.
Tarrah C. Davis joined the University of Louisiana at Lafayette first as a Graduate Assistant in 2009 and worked closely with the Associate Dean during the NCATE Accreditation. In 2011, Tarrah became an Instructor for Curriculum and Instruction and PASS-PORT Facilitator/Coordinator for the College of Education. Since 2012, she has worked as the Assessment Coordinator for the College of Education. Tarrah C. Davis holds a Bachelor of Arts in Elementary Education (2000), a Master of Education degree in gifted education (2004), a plus 30 degree in Education (2011), and a Doctor of Education degree in

	Lafayette. She is certified to teach elementary grades (1-8), computer literacy, and the academically gifted. Tarrah is currently employed at the University of Louisiana at Lafayette, and is currently serving as the Assessment Coordinator as well as Educational Foundations and Leadership Assistant Professor for the College of Education. Tarrah is also married and is the mother of 3 children.
	Prior to working at the University of Louisiana at Lafayette, Tarrah was an elementary teacher for nearly 10 years. She worked in both public and private schools. Tarrah was an elementary and middle school teacher and has had the opportunity to work in several different teaching environments ranging from summer school remediation to
	gifted enrichment. This has given her the chance to teach in
	multicultural classrooms as well as multi-ability environments.
